Customs Clearance

Customs Clearance of imports or exports consignments is highly regulated. The correct preparation and completion of the clearance procedures are critical, as heavy penalties may be applied if the correct procedures are not fulfilled.

We can ensure the appropriate documentation is filled out and the correct importing and exporting procedures followed to minimize clearance delays.

We access duty rates, duty concessions and other information traditionally stored in numerous volumes of paper binders within an instant. This combined with our expert clearance personnel ensures our clearance service is second to none.
